Dikshant Kumar

Full Stack Developer (React.js / Node.js / MongoDB / PostgreSQL)

dhimandk261@gmail.com • +91 78180 41318 • github.com/dikshant261 • linkedin.com/in/dikshant-kumar

Professional Summary

Full Stack Developer with 16+ months of experience building production React.js/Node.js/MongoDB applications. Shipped a real-time hospital bed management platform (500+ beds, role-based dashboards for Admin/Doctor/Nurse) and 15+ interactive e-learning simulations used by K-12 and college learners. Strong in RESTful API design, JWT-based RBAC, and LLM integration (OpenAI, Gemini). Comfortable owning features end-to-end, from client requirements through deployment.

Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3, C
- **Frontend:** React.js, Tailwind CSS, Anime.js, Responsive UI, Accessibility (a11y)
- **Backend:** Node.js, Express.js, RESTful API Design, Middleware Architecture
- **Database:** MongoDB, Mongoose ODM, PostgreSQL, Prisma
- **AI / APIs:** OpenAI API, Gemini API, LLM Integration, Prompt Engineering
- **Tools & Practices:** Git, GitHub, Postman, VS Code, Netlify, RBAC, JWT Authentication, MVC Architecture, Agile

Professional Experience

Developer **Aug 2025 – June 2026**

Anabler Consulting

- Engineered 15+ interactive e-learning simulations for mathematical concepts using React.js, CSS, and Anime.js, delivering animation-driven experiences for K-12 and college-level audiences.
- Collaborated directly with clients across the full product lifecycle — requirement gathering, UI/UX iteration, and deployment — consistently shipping production-ready features on schedule.
- Implemented gamified learning flows and real-time visual simulations, improving learner engagement across 15+ modules; optimised component performance for seamless cross-device experiences.

Freelance Full Stack Developer **Mar 2025 – July 2025**

Application Zebra · Client Project (Healthcare Domain)

- Architected a real-time hospital bed management platform supporting 500+ beds across multiple departments, using React.js, Express.js, and MongoDB, with role-specific dashboards and analytics for Admin, Doctor, and Nurse personas.
- Implemented secure Role-Based Access Control (RBAC) with JWT authentication and a sector–service–bed hierarchy; built RESTful APIs for real-time bed tracking and dynamic allocation.
- Integrated multilingual support and optimised backend for high-traffic operations; delivered iteratively with a remote client team, maintaining a stable production-ready codebase throughout.

Education

Master of Computer Applications (MCA) 2023 – 2025

ABES Engineering College, Ghaziabad, Uttar Pradesh

Bachelor of Computer Applications (BCA) 2020 – 2023

SVS School of Management, Mawana (Meerut), Uttar Pradesh
